

# MMI 3G Emergency Update

Version 1.2 – Q1 2014 (by KG)

Step	Instructions
1.	Switch on the MMI 3G.
2.	Enter the green menu (First press <b>Setup</b> and then <b>CAR</b> and hold both buttons down simultaneously for approx. five seconds until the display changes.) 
3.	Green menu comes up 
4.	Go to System → Internal and change to <b>ROW</b> and press return 
5.	Go to SWDL and tick “ <b>Ignore region and variant</b> ” and press return 
6.	Insert the firmware update I have sent you into the MMI unit slot SD1.

7. Go to **System** → and press **emergencyupdate**, and then press **Yes**.

8. MMI will now reboot and enter EmergencyUpdate screen:

**Please Note:** The deletion and programming processes are performed several times, until all components of the MMI have been updated. Wait until the programming process is finished and the system automatically restarts. Your input is not necessary, the flash tool will begin deleting all the existing flash information in this step.

9. Once the above step is completed the programming screen will appear:

**Please note:** No input is necessary from you, the update tool will perform everything automatically.

10. Once the MMI emergency update is completed, you will need to enter engineering menu to verify the version of your MMI, to do this first press **Setup** and then **Return** and hold both buttons down simultaneously for approx. five seconds until the display changes.

**Note:** You can quit the software download process at any time by simultaneously pressing and holding the Tone and Back buttons for more than five seconds.

11. If the update completed successfully then you should now proceed with map installation.
